NAME
>   mda-info − prints out information about a MDA file

SYNOPSIS
>   **mda-info** *file*

DESCRIPTION
>   **mda-info** is a utility for seeing certain information about MDA files, which are created by **saveData** in **EPICS**. Things like scan time, dimensionality, and the scanned positioner(s) are shown. The only thing **mda-dump** needs is *file*, the name of the MDA file.
>
>   This program does not load the entire file, so it's fast.
